

Market Information

Oslo, January 2015

(O.S.Rød, President Norsk Biogass AS)

Norsk Biogass AS has over time worked for a sustainable solution where the company's unique BioSep® technology and well developed BioPrePlant® process design would be given an even better foundation for future growth.

I am pleased that we now can announce that Norsk Biogass AS has signed a licensing agreement with Goodtech Environment AB, which will take over all marketing and sales of BioSep® separation units and BioPrePlant® process designs for a period of 5 years. We have collaborated with Goodtech Environment on several project deliveries in the past and now have an even closer co-operation for the benefit of both new and existing customers.
